

CO5-Class Activity I/O Operations

O. Bhanu Prakash Reddy

192372075

1.Create a program to create a file and write the data

Code:

```
import java.io.FileWriter;
import java.io.IOException;

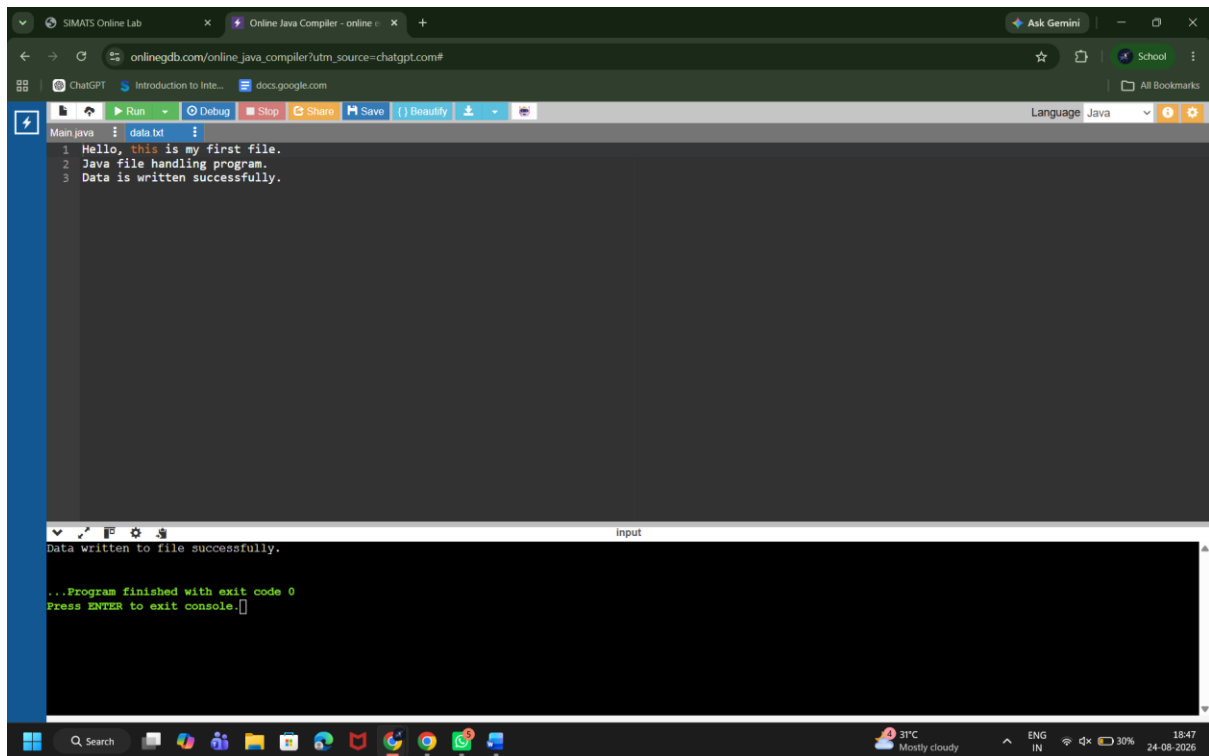

public class Main {
    public static void main(String[] args) {
        try {
            FileWriter writer = new FileWriter("data.txt");

            writer.write("Hello, this is my first file.\n");
            writer.write("Java file handling program.\n");
            writer.write("Data is written successfully.");

            writer.close();

            System.out.println("Data written to file successfully.");
        } catch (IOException e) {
            System.out.println("An error occurred.");
        }
    }
}
```

Output:

The screenshot displays a web browser window with the URL `onlinegdb.com/online_java_compiler?utm_source=chatgpt.com#`. The browser's address bar shows the page title "Online Java Compiler - online". The page features a toolbar with buttons for "Run", "Debug", "Stop", "Share", "Save", and "Beauty". The main editor area contains a Java file named `Main.java` with the following code:

```
1 Hello, this is my first file.  
2 Java file handling program.  
3 Data is written successfully.
```

Below the editor, the "input" section shows the output of the program:

```
Data written to file successfully.  
  
...Program finished with exit code 0  
Press ENTER to exit console.
```

The Windows taskbar at the bottom indicates the system time as 15:47 on 24-08-2025, with a weather forecast of 31°C and "Mostly cloudy".
