3.Create a program to copy content from the file?

Code:

```
import java.io.FileReader;
import java.io.FileWriter;
import java.io.IOException;

public class Main {
    public static void main(String[] args) {
        try {
            FileReader reader = new FileReader("data.txt");
            FileWriter writer = new FileWriter("copy.txt");

            int ch;

            while ((ch = reader.read()) != -1) {
                writer.write(ch);
            }

            reader.close();
            writer.close();

            System.out.println("File copied successfully.");
        } catch (IOException e) {
            System.out.println("File error.");
        }
    }
}
```

}

Output:

The screenshot displays a web browser window with the URL `onlinegdb.com/online_java_compiler?utm_source=chatgpt.com#`. The browser's address bar shows the page title "Online Java Compiler - online". The page features a toolbar with buttons for "Run", "Debug", "Stop", "Share", "Save", and "Beauty". Below the toolbar, the code editor shows the following Java code:

```
1 Hello, this is my first file.  
2 Java file handling program.  
3 Data is written successfully.
```

The output window, labeled "input", displays the following text:

```
File copied successfully.  
  
...Program finished with exit code 0  
Press ENTER to exit console.
```

The Windows taskbar at the bottom of the screen shows the system clock as 18:35 on 24-08-2026, with a weather widget indicating 39°C and "Mostly cloudy".
